BOOK SYNOPSIS

Neste novo livro, Michael Fairbanks e Stace Lindsay argumentam que as tremendas vantagens que as nações em desenvolvimento possuem em recursos naturais, mão-de-obra barata e solo fértil na realidade as mantiveram na pobreza. Suas vantagens-facilmente imitadas em outras partes do mundo- não constituíram força motora suficiente para o crescimento. Bilhões de dólares foram gastos para erradicar a pobreza; mesmo assim, essas regiões permanecem dependentes como sempre de voláteis exportações de recursos naturais e ajuda externa. Arando o mar é a tentativa dos autores de trazer à tona e nutrir as fontes ocultas do crescimento- conhecimento, inovação e capital humano- que permanecem inexploradas nos países em desenvolvimento.
